ABOUT ME

I am a Computer Engineer with an interest in software development with Java, I like computational mathematics, learning new things and increasing my skills to solve real life problems, that is why the software development environment is perfect for my personal and job growth.

EXPERIENCE

Developer

Stefanini | September 2022 – at present

I generate .csv archives using Python with a CRUD processing and transforming the information to develop a few solutions in a project to the banking sector using an agile methodology.

Generate documentation from a Java Maven project using Plantuml to create the different diagrams and I modifying the readme.md to add these diagrams. This project was developed with Java 8, Maven, Oracle DB, Spring, GIT and Jira.

Java Developer

TCS | February 2022 – August 2022

I solve some bugs in the backend in a Java Maven project and I make and refactor JUnit test using different tools like Eclipse, JUnit, Spring Tool Suite, SQL Server, GIT and we used an agile methodology.

Freelance Developer

January 2021 – January 2022

I develop a Sales system for a Pharmacy with different types of users (seller, manager, and user) using Java 11 and MariaDB. A web system to control access for a gym, this system reads a QR and gives information about the membership of the user using Java 11, MariaDB and Spring Boot.

EDUCATION

Computer Engineer

Universidad Autónoma del Estado de México
August 2017 - June 2022
